Accounts Module

Designed to be easy to use, yet powerful and flexible, Accounts system allows you to track bank accounts, income and expenses. As quick and easy to use as a checkbook register, it is based on professional accounting principles to ensure balanced books and accurate reports. It is fully integrated with the rest of iHire Software® hiring modules.

Accounting system main features

- a) Allows you to create multi-level chart of accounts in a very flexible way.
- b) Allows you to register all kinds of asset from single screen. You can also view the details of asset movements in detail through the system.
- c) Easy posting of registered asset.
- d) The System automatically calculates depreciation on a monthly basis and does post it in a single click.
- e) Shows you the profit and loss easily.
- f) While registering a dispose of asset, the system automatically brings the booked value for that asset.
- g) Automatically calculates deferred interest from the data fed by the Payment system.
- h) The system calculates and stores the monthly prepaid insurance value while attaching the insurance certificate given by the Equipment Care system.
- i) Petty cash management with the controlling of the daily expense activities.
- j) Allows you to post journal vouchers.
- k) Automatically calculates online trial balance for a given parameter. Through this you can easily manage every individual account head.
- l) Registration of deposits to bank is featured.
- m) Easy interface to do the Bank reconciliation.

-
- n) All kinds of transactions are visible in proper account head-wise.
The system allows reviewing the transactions and correcting the entry in case of incorrect data.
 - o) Various types of reports are provided through the system.

Payable system main features

Payable system allow to create the verity of payment vouchers for multiple or single payment for vendor/supplier. The system allows to print the cheques on preprinted bank stationery. Fully Integrated with Purchase module and document management module. System have feature to Entering the various kind of Payable invoice and do the voucher allocation. System allow to follow-up up for Voucher, Invoice and LPO.
