What is iHire Software Solutions?

iHire Software system was developed to help you achieve your market targets. It will enable you to provide quality service, best selection of equipment for the job, keep excellent customer relations, maintain professional staff, offer competitive hire rates, save on labour costs, save on equipment costs and ensure fast growth.

iHire Software Scope & expertise

iHire Software is a comprehensive system which was developed in-house by a team of professionals over a number of years. The expertise of the hiring industry was meticulously incorporated into this system in such a way that it handles all the practical aspects of hiring in a systematic workflow manner and guarantees proper interactions between the different stages of the hiring process.

The 21 years of solid experience accumulated by Abu Amer Equipment Hiring Company and its new international brand Mister Machine was fully incorporated into iHire Software. The system has been live and meeting the management needs since 2004. The system helped the company to sustain a 30% annual growth.

Confidence & Control

iHire Software will give the management of any hiring company the confidence and control over all their hiring operations. All hiring operations can be monitored live through a variety of reports and interfaces.

iHire Software System Functionalities

iHire Software provides medium to major hiring companies with all the required functionalities such as: enquiries, customer bookings, contract preparation, dispatching & deliveries, equipment working time cards, driver & operator assignments, gate pass monitoring, off-hires, equipment maintenance, purchasing, debt collections, comprehensive accounting, bank reconciliations, payroll & HR and employee time attendance.
One of the major challenges in the hiring industry is the issue of planning your hiring and honouring contracts in such a way to increase equipment utilisation and profitability. This is done by planning between the short term and long term hiring which ensures maximum utilization of equipment.

Extra Features to improve productivity

The system is fully integrated with a faxing module, an email module, a document management & archiving module and fuel monitoring & control module and a comprehensive maintsnance module. These extra features plialy a major role in increasing the productivity, reducing the overheads, improving the utilisation of staff, equipment and faster response to customers.

"iHire Software is extremely reliable and never breaks down. It will give you the peace of mind you deserve"

Handling of Multiple Branches
The system can link all the branches fo the hiring company to a central server via a leased line or over the VPN.
Branches act like agents for the company with the facility to hire any type of equipment or service in consultation with the division concerned.

Handling of Multiple Divisions
The system allows the hiring company to divide its business into a number of divisions where each division specialises into special types of equipment.
For example, the model at Mister Machine company has the following divisions: Access Platform, Formwork and Scaffolding, Generators and Compressors, Heavy Equipment, Light Equipment, Portable Cabins, Raw Materials, Skip Services and Transportation and logistics division.

iHire Software as a sales system
iHire Software has a fully developed sales module which handles the sales of used equipment and raw building materials.

iHire Software flexibility
The system is highly parameterized and allows the hiring company to review and change its varying business parameters such as: hiring rates, creating different types of hiring contracts, adding new equipment and equipment categories, making different maintenance schedules for all types of equipment, deciding credit limits of customers, etc.

How can i get iHire Software and what does it include?

Acquiring iHire Software
You can acquire iHire Software through one of the following methods:

1. Direct purchasing
2. Leasing through a contract
3. Charge on a percentage of revenue

We are ready to discuss the most suitable option for you. However, the most preferred option is the charge per transaction where you pay an initial installation and training fee and then you pay as you use (paying a percentage of your revenue on a monthly basis).

Get iHire Software Maximum support
When you acquire iHire Software, you can rest assured
you will get the best professional support from our
team of professionals.
We will help you set up the system and you will be
guaranteed the following support:

Training
We will train your IT team so that they can
handle the system. Our team of IT
professionals will guide and support your
IT team on a continuous basis.
Our IT professionals will only be a phone
call or an email away at any time.

Installation
Our IT team in cooperation with your staff
will set up your network, servers and
security. Further, your staff will be trained
on all aspects of the system modules,
parameters, configuration, etc. iHire
Software is extremely reliable and never
breaks down.

24/7 Support
We are available 24 hours a day, 7 days a
week to give you all the support you need.

Data Migration
If you are already using a system, we will
help you do the data migration which will
smooth the move to iHire and guarantees
continuity.

What can iHire Software do, and how will it help my business?

iHire Rental System

Contract System
The contract system allows you to make different types of hiring contracts from a single interface. The system allows you to make the contract for a variety of hiring periods, ranging from one day to one year and accordingly calculate the rates.

Customer Selection & Validation
One of the most problematic tasks in equipment hiring is keeping track of customer status.
By analyzing the information at hand, the system will guide the sales person on the customer status by analyzing and reporting the customer credit history, payments history, etc.
In turn, it will enable the sales person to make an informed decision whether to go ahead with the contract or advise another course of action.

Dispatching & Deliveries System
The system allows dispatchers to plan equipment deliveries. There is a provision to change the delivery date and time as per customer requirement. The system also provides an easy to use interface to assign operators, drivers, check fuel status, etc.

Equipment Time Card
Each machine has a time card used for registering equipment working hours or days against any given contract. Extra hours or days will automatically be calculated and invoiced.

Integrated Fax and Email System
iHire is integrated with email and fax modules which improves productivity and reduces stationery consumption.

iHIRE SOFTWARE

Contract Follow-up
iHire gives the hiring company a dynamic view of the status of any contract at a glance by displaying all the related information on a single screen. This dynamic follow-up window will display pending deliveries, equipment at site, off-hired equipment, real time calculation of invoiceable amounts, refunds, credit notes, collection notes, etc.

Equipment Collection
The automatic reminder system reminds users to call the customer to extend the contract or prepare a collection note to return the equipment from customer site.

Off-Hire
Users can make the off-hire of received/collected equipments from site and can enter details such as meter reading, equipment condition and fuel level.

Gate Pass System
iHire System keeps track of the movement of drivers, operators and equipment leaving base or coming in from site. Giving dispatchers and sales staff live information about the status of equipment, drivers and operators.

Maintenance System
This module helps you plan and record all types of maintenance and spare parts used. This will help reduce the down time of equipment and keep exact track of your maintenance.

Inventory System
The inventory system will keep track of your inventory in multiple stores.

How easily can I manage my accounts?

iHire Software
Payment Processing System

Payment Entry and Allocation
iHire allows you to receive and register any kind of payment such as cheque, bank transfer, credit card & cash. It accepts multiple modes of payment in a single payment receipt.

Payments can be registered as advance payments or payment of due invoices. In the case of customers making excess payment for a contract, the system allows you to refund the customer.
The system also allows customers to replace one payment type with another, tracking it in the system all the way to the bank.

Payment collection handover
iHire allows an employee to be assigned in charge of collections of all kinds of payments from branches, sales offices and from debt collectors. All collections are registered in the system, which are then transferred to the bank.

All payments deposits in the bank are registered in the system which allows proper tracking of bank statements. The system also allows you to do bank reconciliation, canceling of deposits, cheque rejection and cheque realization.

Invoicing
The system generates a variety of invoices depending on the nature of the hiring contract or sales contract. Invoices can be either cash or credit invoices. They can also be generated for single or multiple contracts.

Invoices discounts
Although discounts are normally given prior to the contract and are documented as part of the contract, the system allows the invoicing department to make discounts while generating the invoice.

Credit notes and debit notes
Credit notes and debit notes adjustments can be posted after the invoice is generated to cater for any eventual customer dispute.

rizwan@mister-machine.com

Debt Collection
This feature provides a number of sophisticated options for debt collection. It provides all the support required for the debt collector to track and collect payments in an efficient manner. These features include:
• customer payment history,
• tracking collections,
• cheque realization history,
• customer credit history and due or overdue invoices.
iHire also allows the debt collector to enter collections follow-up notes and reminders for next follow-up.

Hiring Rates
Equipment hiring rates are entered into the system based on a number of factors relating to the cost of the equipment, the hiring option, period of hiring, attachments to the equipment, with or without added services, etc.

Voucher preparation
This feature allows you to create payment vouchers for multiple or single payments. The system allows you to print cheques on preprinted bank stationery.

Accounting
This is a complete accounting system covering all aspects of accounts relating to the hiring and sales business. All features of the accounting system are fully integrated with the hiring components of the software.

Manage your employees to be more productive

iHire
Time and Attendance System

iHire Software ® Time and Attendance system is the market leader in providing costeffective and reliable employee time and attendance solutions for organizations of every size. It gives the employer the ability to allow staff to punch in and out from pre-defined punching terminals (PCs or tablets).
It stops employees from falsely punching for each other.

It provides unmatched accuracy in tracking employee work hours and gives employees the convenience and ease of punching in and out.
It saves on manual salary calculations and prevents human mistakes. Our system is very cost effective that make your business more efficient and productive.

Main features

a) Allows the employee to enter his ID when punching in or out. The system takes a picture of the employee while punching and automatically sends a notification to the supervisor and related departments as configured by management.

b) The system sends real time pop-up notification of employees' In/ Out to pre-defined supervisors/ managers.

c) The system could integrate with Payroll module.

d) Allow users to define work schedules for employees.

e) Define punching terminals access rules.

f) Block or unblock certain employees from punching while displaying custom messages.

g) Define early arrival rules with the ability to display custom messages.

h) Define late arrival rules.

i) HR staff can view missing attendance entries and the ability to correct them.

j) HR staff can add notes for attendance entries.

k) Users with access rights can generates reports in different formats (excel, PDF, text) for the following:

• Daily, weekly, or monthly reports for any employee or all employees with the attendance pictures.

• Report for the total working hours for employees showing the total worked hours, overtime, less hours, etc.

• Daily, weekly, or monthly missing attendance reports.

• Terminal Logs report.

Applicable business Types

This module is suitable for any Business Organization of any size. It is extremely useful for any business with more than 10 staff using the old time cards punching system (Legacy system).

It can be used by companies having branches in multiple Cities, and Countries.
